

TABLE OF CONTENTS
COMPREHENSIVE SABINE WATERSHED MANAGEMENT PLAN

EXECUTIVE SUMMARY

1.0	INTRODUCTION	1-1
1.1	Background	1-2
1.2	Sabine Basin Hydrology	1-5
1.3	Water Rights	1-9
1.4	Mineral Resource Evaluation	1-11
2.0	WATER NEEDS	2-1
2.1	Population Projections	2-1
2.2	Water Use	2-2
2.3	Projected Water Demands	2-6
3.0	EXISTING SURFACE WATER SUPPLIES	3-1
3.1	Sedimentation	3-1
3.2	Existing Lakes and Reservoirs	3-2
	3.2.1 SRA Reservoirs and Canal System	3-2
	3.2.2 Other Sabine Basin Lakes and Reservoirs	3-5
	3.2.3 Louisiana Lakes and Reservoirs	3-8
3.3	Committed Supplies	3-9
3.4	Contracting Issues	3-11
4.0	EXISTING GROUND WATER SUPPLIES	4-1
4.1	Aquifer Descriptions	4-2
4.2	Aquifer Demands and Ground Water Availability	4-7
	4.2.1 Ground Water Availability	4-10
	4.2.2 Current Ground Water Problems	4-14
5.0	COMPARISON OF EXISTING SUPPLY AND PROJECTED DEMAND	5-1
6.0	ADDITIONAL SUPPLY FROM WATER CONSERVATION	6-1
7.0	POTENTIAL SURFACE WATER PROJECTS	7-1
7.1	Previously Proposed Reservoirs	7-1
7.2	New Reservoirs	7-13
7.3	Pipeline from Toledo Bend Reservoir to Upper Basin	7-16
7.4	Diversions from Sabine River	7-17
7.5	Importation	7-18
7.6	Opinion of Estimated Costs	7-18
7.7	Recommendations	7-21

8.0	POTENTIAL GROUND WATER RESOURCES	8-1
8.1	Development of New Ground Water Supplies	8-1
	8.1.1 Ground Water Availability	8-2
	8.1.2 Costs	8-5
8.2	Aquifer Storage and Recovery	8-5
	8.2.1 Kilgore Site	8-7
	8.2.2 Canton Site	8-9
	8.2.3 Preliminary Cost Estimate for ASR	8-11
9.0	WATER AND WASTEWATER TREATMENT NEEDS	9-1
9.1	Water and Wastewater Treatment Survey	9-1
9.2	Septic Systems	9-2
9.3	Recommendations	9-3
10.0	WATER QUALITY & ENVIRONMENTAL ISSUES	10-1
10.1	SRA Water Quality Monitoring Program	10-1
	10.1.1 SRA Monitoring Program	10-1
	10.1.2 Watershed Influences on Water Quality	10-4
	10.1.3 Recommendations for SRA Water Quality Monitoring Program	10-7
10.2	Environmental Considerations and New Reservoir Development	10-8
	10.2.1 Environmental Regulations	10-9
	10.2.2 Existing Conditions	10-13
	10.2.3 Priority and Protected Areas	10-15
	Wetland Mitigation Banks and Conservation Easements	10-15
	Evaluation of Three Potential Wetland Mitigation Bank Sites	10-16
	Bottomland Hardwood Habitat	10-17
	Floodplain Hydrology	10-20
	10.2.4 Recommendations for New Reservoir Development	10-21
11.0	OTHER WATER RELATED ISSUES	11-1
11.1	Recreational, Tourism, and Economic Development	11-1
11.2	Flood Control	11-3
11.3	Environmental Flows	11-3
11.4	Navigation	11-4
12.0	INFORMATION MANAGEMENT AND PUBLIC PARTICIPATION	12-1
12.1	Information Resource Issues	12-1
	12.1.1 Goals	12-1
	12.1.2 Current Information System	12-2
	12.1.3 Conclusion and Recommendations	12-4
12.2	Public Participation	12-5

13.0	RECOMMENDATIONS	13-1
13.1	Water Supply Development Recommendations	13-1
13.2	Environmental Recommendations	13-5
13.3	Information Management, Economic Development, & Public Participation Recommendations	13-6
13.4	Water and Wastewater Treatment Recommendations	13-7

APPENDICES

Appendix A	References
Appendix B	Water Rights
Appendix C	Population and Water Use Projections
Appendix D	Hydrologic Data
Appendix E	Water Supply Distribution by County
Appendix F	Cost Estimates - Proposed Reservoirs
Appendix G	TWDB Comments on Draft Report and Responses

FIGURES

- ES.1 Recommended Water Resource Development
 - 1.1 Sabine Basin Map
 - 1.2 Rainfall Isoclines
 - 1.3 Average Monthly Streamflow Discharges
 - 1.4 Oil and Gas Reserves
 - 1.5 Lignite mining
 - 1.6 Industrial mining

 - 2.1 Projected “Most Likely” Population in the Sabine Basin
 - 2.2 Sabine Basin Municipal Water Requirements by Scenario
 - 2.3 Sabine Basin Projected 2050 Water Demand
 - 2.4 Water Use Requirements by Decade

 - 3.1 Existing Surface Water Reservoirs - Upper Basin
 - 3.2 Existing Surface Water Reservoirs - Lower Basin

 - 4.1 Aquifer Locations
 - 4.2 Aquifer Outcrop Locations

 - 5.1 Projected Need for New Supply – Upper Basin
 - 5.2 Projected Difference in Supply/TWDB Needs - Lower Basin

 - 7.1 Previously Proposed Reservoirs - Upper Basin
 - 7.2 Previously Proposed Reservoirs - Lower Basin
 - 7.3 Developmental Concerns
 - 7.4 Schematic of Transmission Pipeline Route
 - 7.5 Cost Comparison for Projected Need

 - 10.1 SRA Water Quality Monitoring Sites
 - 10.2 TNRCC Stream Segments and SRA Reaches and Subwatersheds
 - 10.3 Land Use
 - 10.4 Water Quality Issues Associated with Subwatersheds
 - 10.5 Land Use of Subwatersheds with Physiochemical Water Quality Issues
 - 10.6 Land Use of Subwatersheds with Biological Water Quality Issues
 - 10.7 TNRCC Permitted Landfills
 - 10.8 TNRCC Permitted Discharges
 - 10.9 Potential SRA Wetland Mitigation Banking Sites
 - 10.10 Proposed Reservoirs, Priority Areas, and Protected Areas

 - 12.1 Current Information System Configuration

 - 13.1 Recommended Water Resources Development

TABLES

- 1.1 Texas Counties in the Sabine Basin
- 1.2 Summary of Water Rights in Sabine Basin

- 2.1 Sabine Upper Basin Water Demand by Use Type
- 2.2 Sabine Lower Basin Water Demand by Use Type

- 3.1 Estimated Sedimentation Rates and Future Capacities of Reservoirs
- 3.2 Summary of Existing Reservoirs and Lakes in the Sabine Basin
- 3.3 Committed Surface Water Supply - Texas Sabine Basin

- 4.1 Existing Ground Water Users
- 4.2 Ground Water Demand by County
- 4.3 Ground Water Demand by Use Type – Year 2000
- 4.4 Ground Water Availability by Aquifer
- 4.5 Ground Water Availability by County
- 4.6 Identified Ground Water Problems – Upper Basin

- 5.1 Comparison of Existing Supply and Demands

- 6.1 Municipal Conservation Savings Projections
- 6.2 Manufacturing Demand and Conservation Savings
- 6.3 Conservation Savings for Steam Power Use
- 6.4 Summary of Potential Conservation Savings

- 7.1 Previously Proposed Water Supply Reservoirs
- 7.2 Newly Proposed Water Supply Reservoirs
- 7.3 Transmission Pipeline Analyses
- 7.4 Scalping Operations for Proposed Reservoirs
- 7.5 Estimated Costs for Proposed Reservoir Projects

- 8.1 Potential New Ground Water Supply
- 8.2 Water Supply Well Data for the Cities of Canton and Kilgore

- 9.1 Major Water Suppliers and Wastewater Providers
- 9.2 Water Supply Information for Large Water Suppliers/Users in the Sabine Basin
- 9.3 Wastewater Information for Large Wastewater Providers in the Sabine Basin

- 10.1 Water Quality Monitoring Regime for 1998-99
- 10.2 Endangered and Threatened Species Potentially Occurring in the Counties of Proposed Reservoir Development
- 10.3 Priority and Protected Areas Located at Proposed Reservoir Sites and Estimated Mitigation
- 10.4 Relative Level of Environmental Concern Related to Proposed Reservoir Sites
